Heritage

We are celebrating Lladró's 70th anniversary. Seven decades revolutionizing the world of porcelain, both in the handcrafted processes of working with this natural, age-old material as well as in product diversification, as we can readily see in our annual new launches.

The creations you will find in these pages showcase the level of technical and artistic excellence Lladró has achieved over these years. They are capable of awakening the best feelings in us because they speak the universal language of emotions, of culture and of traditions. Works handcrafted in porcelain that tell us the most wonderful stories.

WORKS OF ART
IN PORCELAIN

Spanish Pure Breed

Spanish Pure Breed - Haute École is a porcelain sculpture in a limited edition of 500 units which depicts one of the world's most prestigious horse breeds with utmost faithfulness and anatomical precision. In a spectacular demonstration of control over sculpture, this beautiful creature is elegantly executing a courbette, one of the classic Haute École dressage movements.

The decoration is another of the highpoints of this exquisite piece: all the horse tack, including the harness, bridle, saddle and blanket are richly ornamented with golden luster, while the bit and stirrups are made in gold-plated brass and the reins and stirrup straps are natural leather.

The intense blue and gold that dominate the coloring of the adornments contrast with the whiteness of the skin, rendered with extraordinary detail that further heightens the sense of realism.

A representation of its supreme power over all creatures in oriental mythology, *Protective Dragon* is a *High Porcelain* creation, in a limited edition of 777 units to commemorate Lladró's seven decades.

A symbol of strength, protection and good luck, this legendary being, existing in all ancient oriental cultures, wards off evil spirits, protects the innocent and provides safety to all those who possess it.

PROTECTIVE DRAGON

This special edition stands out for its striking decoration, with a special mention for the golden luster combined with details in blue and red enamels. The hundreds of scales covering the dragon's skin are minutely hand-painted one by one.

The undulating shape of this complex sculpture is reminiscent of the figure eight, the number of good luck in oriental culture.

When King Leonidas and the three hundred Spartan Hoplites under his command held off the Persian army at the Thermopylae pass, the courage and sacrifice of these Greek warriors entered into the realm of legend for evermore.

This black porcelain sculpture depicts one of those brave soldiers equipped with his spectacular helmet with plumes, a mask—which can be placed or removed to reveal the warrior's face thanks to a magnet system—shield, lance and armor. The wealth of detail, added to the decoration, the precisely modelled anatomy and the meticulous ornamentation demonstrate an extraordinary degree of virtuosity.

Ebony Goddess

It was the golden age of jazz and cabaret, art decó and avant-garde art movements. Theaters and stages came alive with African rhythms, exoticism and joie de vivre. This creation is an homage to a whole era and an unmistakable artistic style.

Ebony Goddess depicts a dancer full of rhythm thanks to the movement conveyed by the form, the clothing and the wealth of color chosen for the decoration.

There are many outstanding elements in this creation like the decoration of the dress with touches of golden luster, the detailed recreation of the feathers and the expressiveness of the dancer's eyes. Careful observation reveals a work that surprises for the sheer wealth of detail. *Ebony Goddess* is one of those creations that is capable of transporting us to a bold and daring bygone age.

Art inspires art. That is the case of this composition which borrows its reference from the work of Sorolla, the celebrated impressionist known as the "painter of light". Born in the coastal city of Valencia, Spain, this painter of genre scenes, seascapes and landscapes made a name thanks to the intensity of light in his work and his ability to capture sunlight and shadows. This is the Sorolla that inspired this scene of a couple on a romantic boat ride.

This creation is a good example of sculptural composition and ornamental wealth. Worth highlighting is the meticulous bas relief handwork to recreate the embroidery of the lady's dress and shawl, the patterns on her parasol and the etchings on the boat, conveying so well the grain and texture of wood.

A creation dominated by white, the color so closely associated with the work of Sorolla, pastel tones and the flowers, handmade petal by petal.

Lladró artists' consummate control of sculpture is evident in creations like this, an angel engrossed in watching a butterfly that has alighted on the back of his hand.

White matte porcelain was chosen for this piece. The purity of this material is perfect for highlighting all the details of the composition, from the sculpture itself and the flower headdress, to the intricate ornamental work of the angel's and the butterfly's wings.

Soft touches of pastel colors were chosen for the flowers, handmade petal by petal, the bracelet and the butterfly. The result is a creation symbolizing the magic and mystery of nature.

MOMMY PANDA

Many *Heritage* creations, like *Mommy Panda*, have an incredible ability to move us.

This scene of a mother panda with her cub depicts an endearing moment. It is made in matte porcelain on which one can appreciate the meticulous etching to render the bears' coats.

Mommy Panda

The decoration consists solely of black and white with touches of gloss in the eyes. This combination underscores the gaze and heightens the expressiveness of the faces. *Mommy Panda* is a creation with impeccable sculptural quality. A piece that enchants and touches us.

With its long, silky hair and big expressive eyes, the Persian cat is the aristocracy of domesticated felines.

Thanks to the sculptural work and etching, faithfully recreating the cat's coat, this creation conveys the elegance of these cats to perfection.

The piece is made in glazed white porcelain decorated with soft tones of dissolved color. This decorative technique, when applied on surfaces with so much relief, enhances the play of light and shadow and increases the sense of volume, in this case of the cat's hair.

Persian Cat

The touch of color in this composition, besides the blue of the cat's eyes, is in the toy it is playing with, a cute little bird in matte porcelain with touches of golden luster. Although they are purchased as a unit, as they are not joined together, the cat and the bird can be arranged as desired.

This frisky, good-natured little puppy is from one of the most prized breeds by dog lovers.

Puppy Pug is made in glazed porcelain and faithfully reproduces the animal's characteristic features, with its short snout and the peculiar expression of its eyes.

PUPPIE PUG

A light camel tone was chosen for the decoration of the puppy's body, combined with brown and black to recreate the typical colors of its face, thus further enhancing its cute expression. The touch of color and the contrast comes in the form of the yellow candy, also made in glazed porcelain.

Snake

There are few creatures in nature with such strong symbolic and emotional connotations as the snake. Since time immemorial the snake has represented our fears and fantasies and our fascination with the unknown and mysterious.

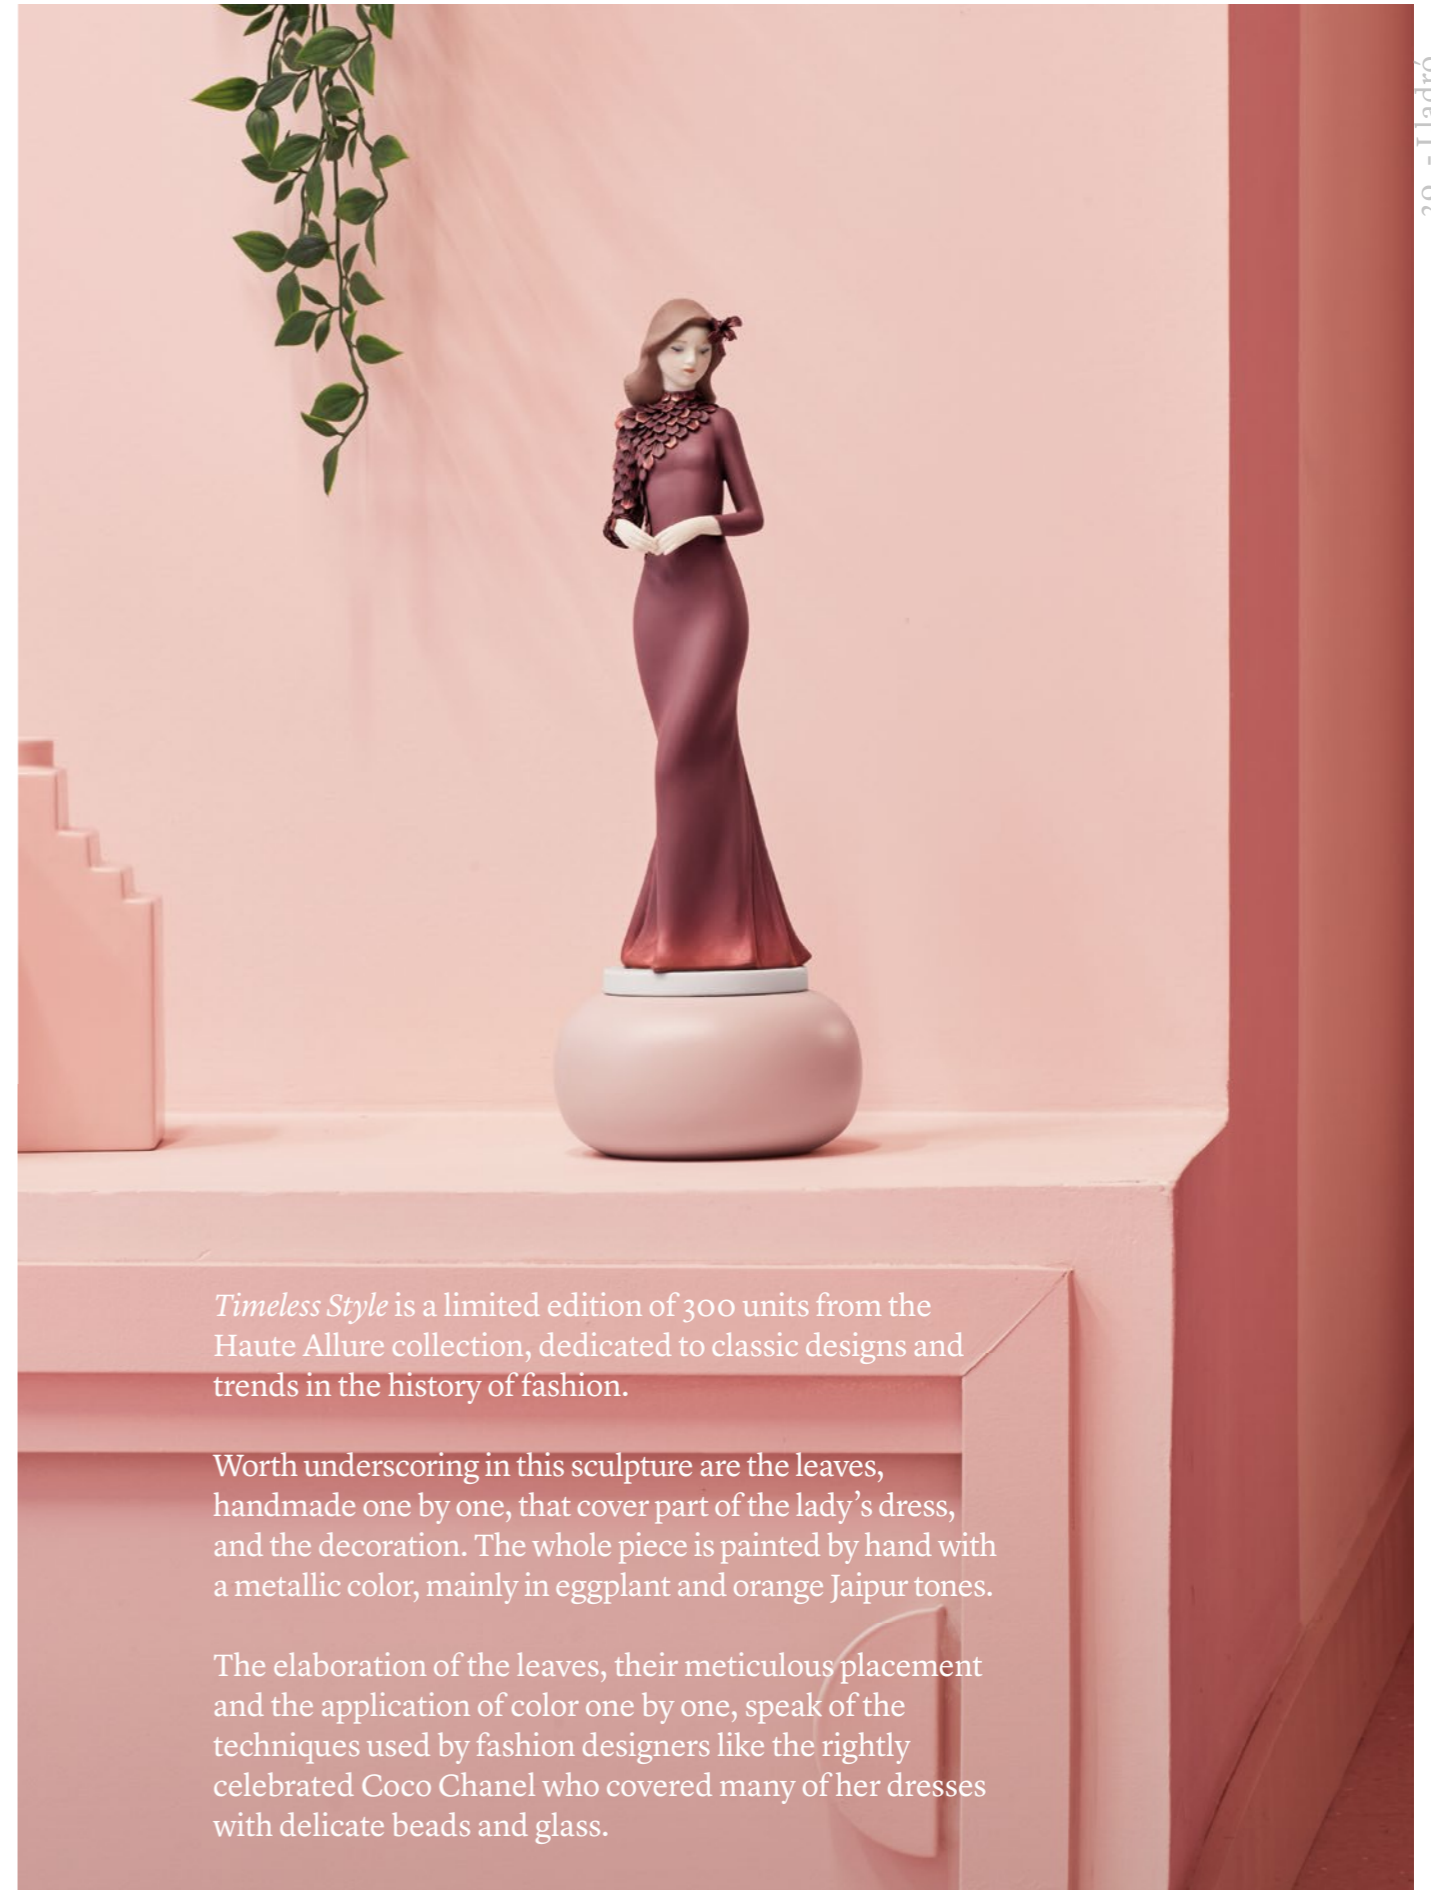

With its sinuous, undulating lines and its penetrating, magnetic gaze, this snake is both captivating and unsettling. Exquisitely modelled down to the tiniest detail, the white porcelain underscores the particular texture of its skin, in this decoration contrasting with the copper luster of the details, also used to highlight its eyes.

Haute Allure

Timeless Style is a limited edition of 300 units from the Haute Allure collection, dedicated to classic designs and trends in the history of fashion.

Worth underscoring in this sculpture are the leaves, handmade one by one, that cover part of the lady's dress, and the decoration. The whole piece is painted by hand with a metallic color, mainly in eggplant and orange Jaipur tones.

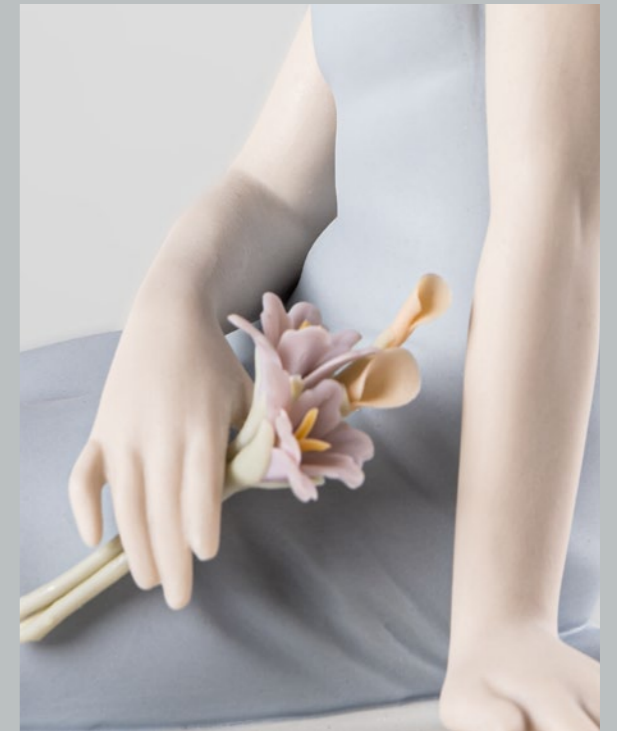

The elaboration of the leaves, their meticulous placement and the application of color one by one, speak of the techniques used by fashion designers like the rightly celebrated Coco Chanel who covered many of her dresses with delicate beads and glass.

Annual piece

Nature Nymph, the 2023 annual piece, boasts all the features of the best Heritage creations. It depicts a nymph in a serene pose, inspired by the world of fantasy and legends. It is made in matte porcelain with a decoration based on soft tones that contrast with the more intense color applied in the hair and eyes.

Particularly worth noting in this creation is the etching in straight lines on the base on which the nymph is sitting, the patterns of the wings and the flowers. The end result is a piece that symbolizes beauty and the delicate balance of nature.

Among the incredible variety of shapes and colors of fish all over the world, the betta is perhaps the most highly appreciated of all. Its bright coloring and spectacular fins have made it a favorite of fish lovers.

Thanks to porcelain's great plasticity, Lladró artists were able to capture the fish's delicate forms as they are swayed by the water and reproduce all the subtle pearly nuances in its coloring.

Vases with flowers

Flowers, the most delicate and beautiful works of nature, are the components from which these vases are made. Unlike floral compositions made petal by petal in porcelain, here the flowers are used to compose the sculpture of the vase itself. They are the result of the work of the sculptor and the team of ornamentation artists, commissioned to recreate and etch each detail by hand.

Two ranges of color were chosen for the decoration. The pink version features pastel pinkish, violet and green tones. The blue version features pastel white and grey tones with touches of deep blue. Both versions also contain details in golden luster.

Flamingos are one of the most stylized and striking birds. The name means “flame-colored”. Because of its fire-red color, the ancient Egyptians believed that it was an embodiment of Ra, the sun god. Flamingos are generally long-lived birds, and a recent observational study has shown that they form lasting bonds of friendship with each other.

Flamingos

The symbolism of flamingos and their instantly recognizable anatomy inspired Lladró artists to depict them in this creation. A couple of flamingos made in matte porcelain with a surprising decoration in pink and golden luster. The result is a very evocative and decidedly contemporary design.

BOLDBLACK

The owl is the symbol of the Greek goddess Athena, associated with intelligence, wisdom and cunning. Lladró artists have chosen the owl for the latest addition to the *Boldblack* collection. The animals in this series are made in black porcelain with just a few touches of golden luster in the decoration. This creation produces a very powerful effect. On one hand for the decoration and, on the other, because the matte porcelain enhances the sculpture and the etching.

This owl stands out for the faithful rendering, the face and the meticulous work in the recreation of its feathering and the wooden trunk. A creation that pays tribute to the animal kingdom which is also highly decorative thanks to the treatment of color.

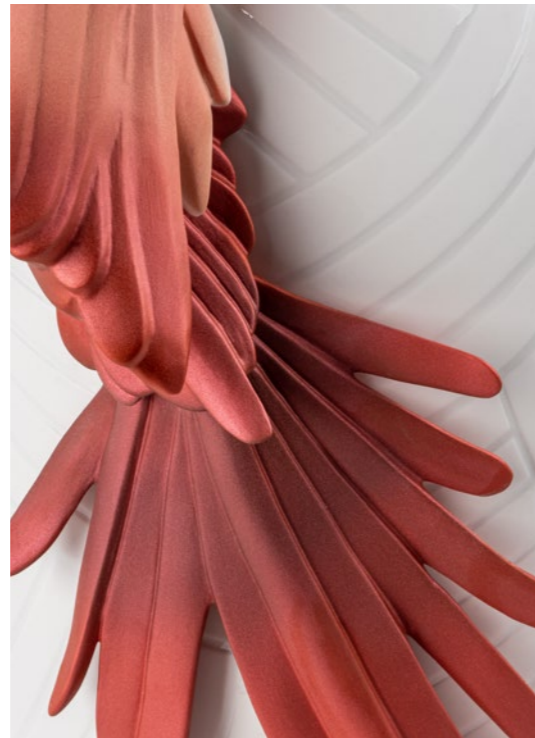

Macaws are one of the world's most spectacular and beautiful birds, famous for the striking coloring of their feathers, which fill the tropical rain forests where they live with light and color.

This series of vases is expanded with this latest addition featuring a macaw with golden beak and claws. The precious treatment of the bird and the wealth of detail of its feathering are combined with the deliberately simple design of the vase itself using geometric lines. The decoration is noteworthy for the red color applied in degraded tones, the metallic grey and the deep blue of the bird's head.

Macaw Vase is not just functional and decorative but is also an appeal to preserve these fantastic, colorful birds, an endangered species under threat of extinction. Let's protect life with art.

Grogu is a cute little character who quickly conquered the hearts of countless fans of the Star Wars saga ever since he first appeared in The Mandalorian series. Our hero is a child of the same species as the Jedi master Yoda and possesses the same powers. The sculptural work in this creation, handcrafted in porcelain, is particularly outstanding for the perfect likeness of the character and for the different decorative techniques used.

His face, ears and hands are decorated with liquid colors, perfect for underscoring all the details of the skin, like the little frown lines, the dimple and the shape of the ears. Pearly touches are also used for the cheeks, as well as soft stony grey and pink tones.

A matte camel color was chosen for his robe, combined with off-white for the collar and sleeves. The off-white color is applied using a technique of painting and erasing that increases the effect of depth in the fabric. And, of course, a special mention is deserved for Grogu's eyes, the only detail for which glazed effects were used, with the goal of making this gaze more intense and alive.

Snoopy™ and Charlie Brown are famous characters created by Charles Schulz for the Peanuts comic strip and Lladró artists have now recreated them again in porcelain. *Snoopy™ Flying Ace* faithfully reproduces Snoopy™ in one of his fantasies as a daring pilot. It is made in satin white porcelain with a carefully chosen decoration featuring silver luster and red for his scarf.

On the other hand, *Snoopy™ Dome* is a lamp made using the lithophane technique in which the light, thanks to the translucency of the porcelain, brings out the pattern etched on the surface. In this case, the characters of Snoopy™, his faithful friend Woodstock as well as Charlie Brown, appear against a painstakingly worked zig-zag frieze.

The dome lamp comes with a USB-rechargeable LED module inside, with a dimmer switch to regulate the intensity of the light.

Lord Balaji, the Lord of Miracles who fulfills the wishes of all those who ask with a true heart, is etched on this dome lamp made using the lithophane technique. The magic of lithophanes is owing to the combination of the light and the translucency of porcelain. When lit inside it gives off a warm light that brings out the pattern etched on the surface.

Spirit of India

For the Parsi community, descended from Persian Zoroastrians, an important part of Indian culture, the Faravahar represents the wisdom of age. It is a protective symbol with different meanings, a guardian angel that exemplifies one of the religion's main teachings: to live with good thoughts, words and actions. It is also believed to symbolize the victory of light over darkness.

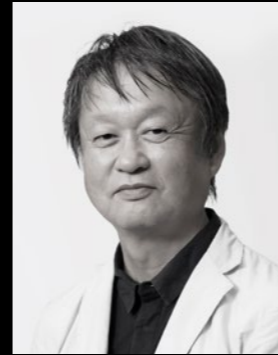

In the bas relief of the plate, executed by Lladró artists, the sacred figure of the Faravahar is enhanced by the delicate ornamentation and the elegant contrast between the purity of the white porcelain and the golden luster of the circular frieze surrounding it.

MOKUREN

MOKUREN / LIGHTING WITH SOUL

Mokuren is the result of the first collaboration between Lladró and Japanese designer Naoto Fukasawa, who is known for combining craftsmanship and design.

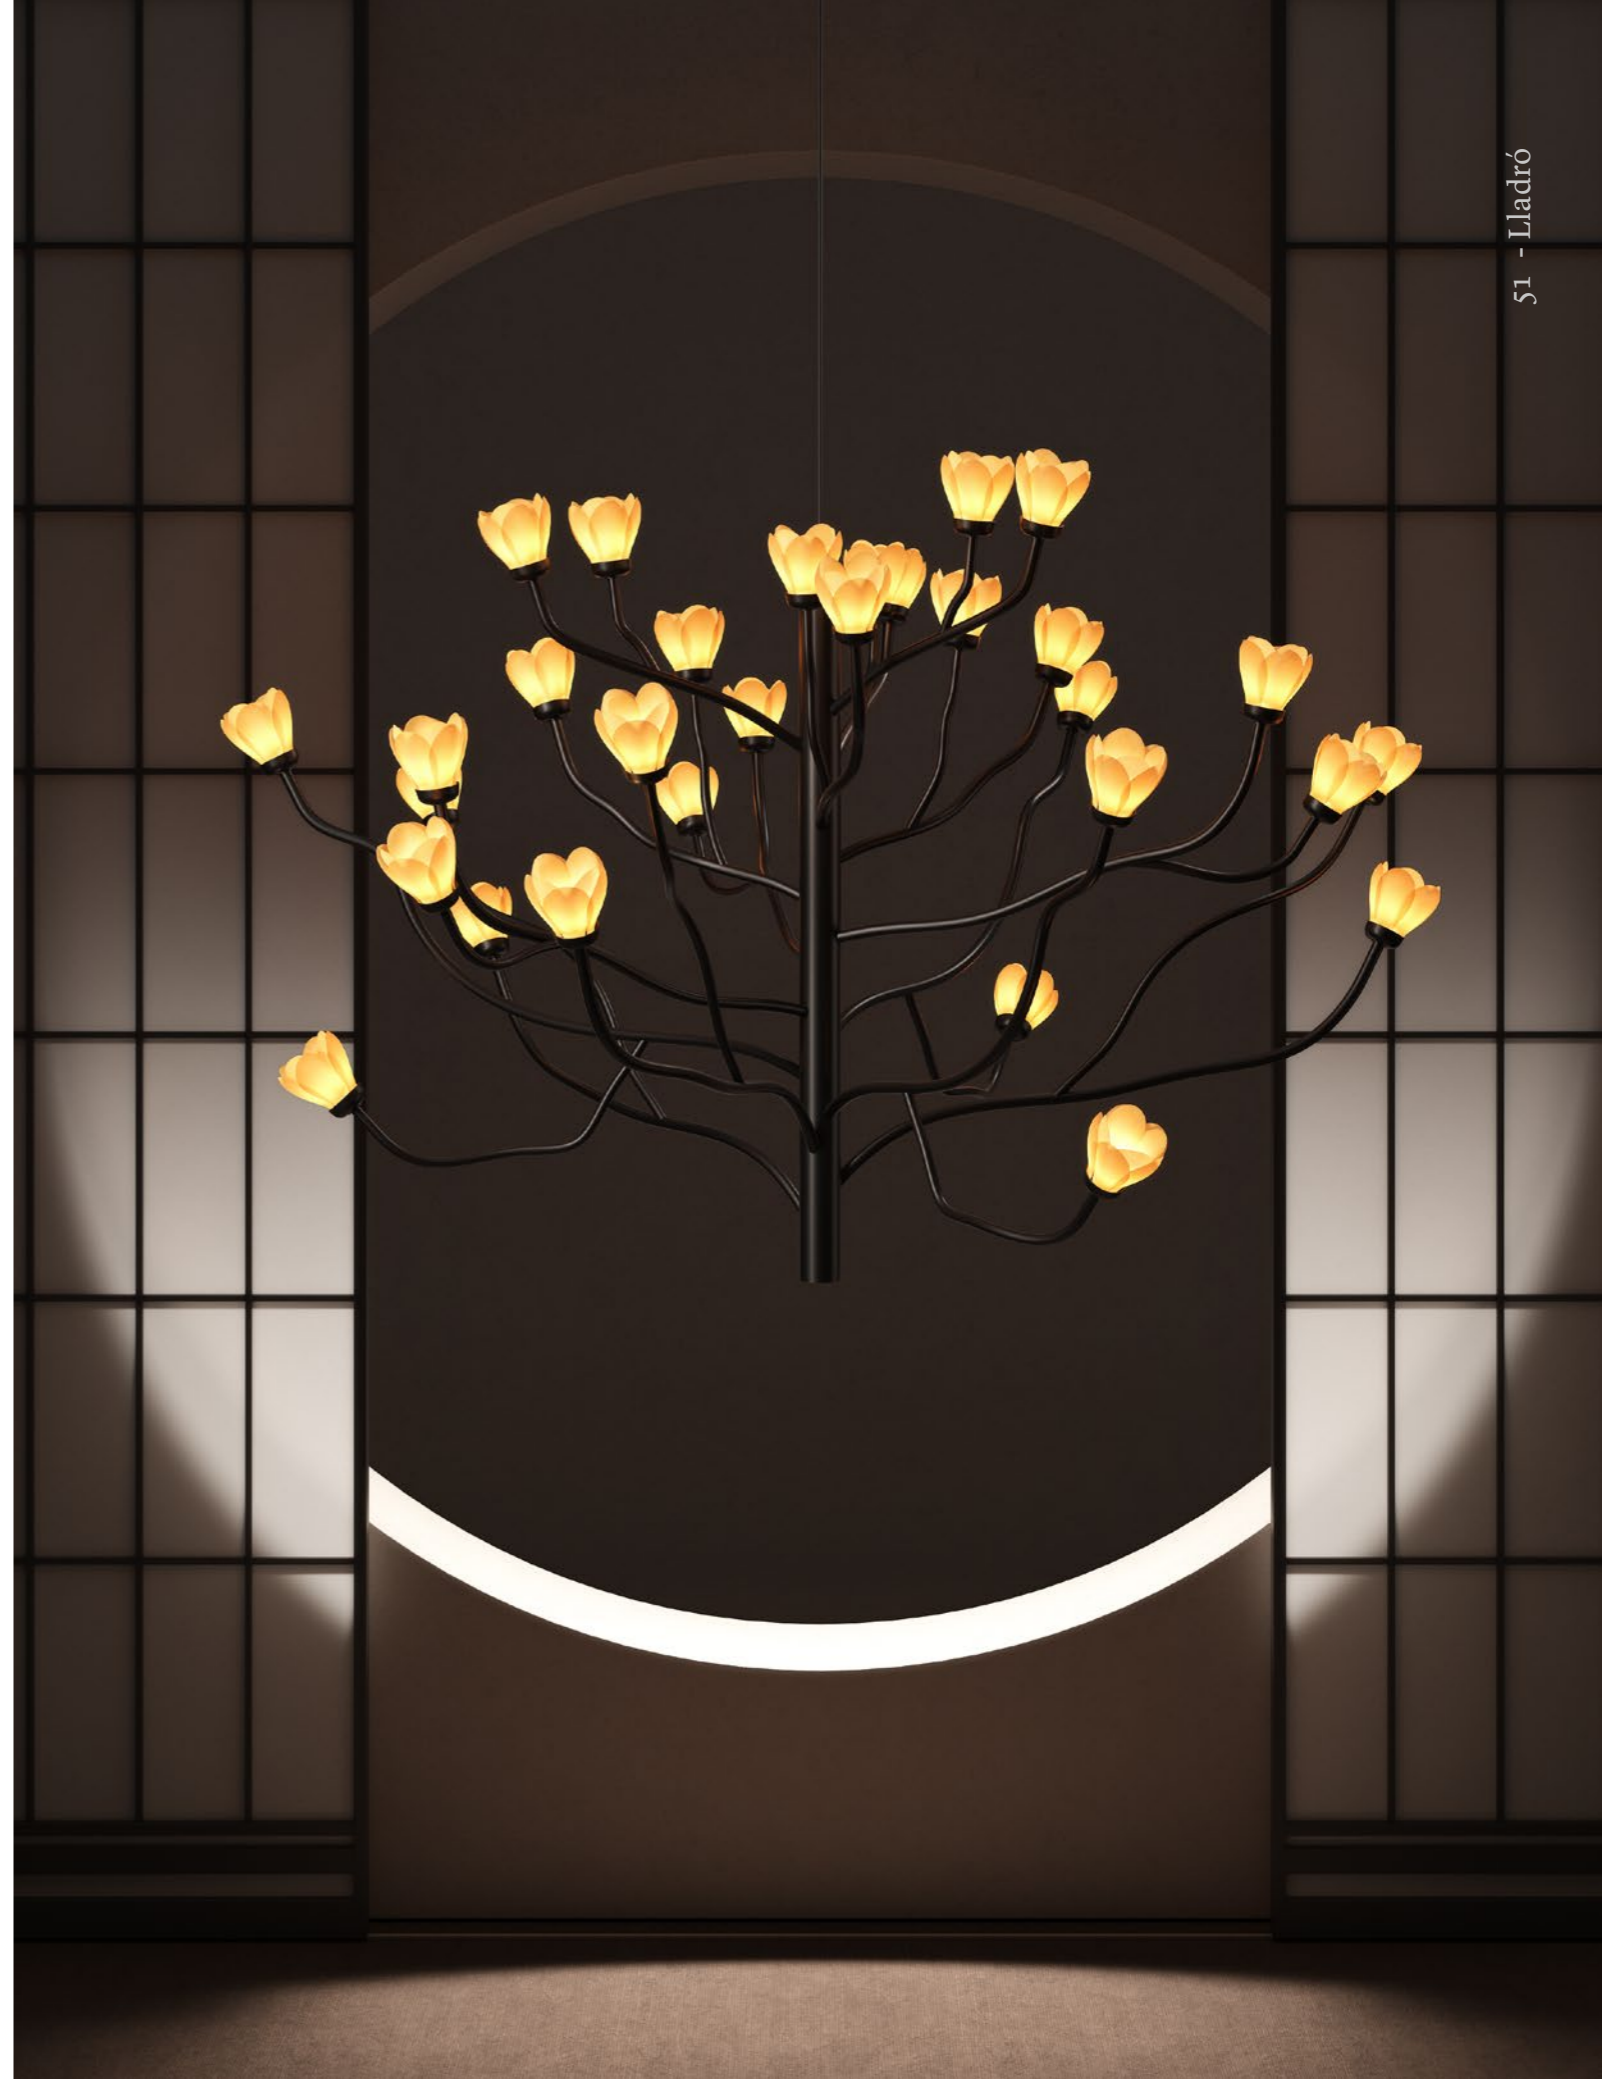

For this work, Fukasawa has been inspired by the white magnolia tree, which symbolizes eternal bonds, and the striking beauty of its flowers. As the author himself says, "when I saw the flower and thought of white porcelain, its texture and qualities, I automatically composed the idea in my head." Thus, *Mokuren* was born, a chandelier that combines the essential ingredients of the work of the Japanese artist and Lladró: nature, craftsmanship and design.

Mokuren is light itself and illuminates, it is Kogei (craftsmanship) and design.

All the flowers that compose *Mokuren* are handmade. The warm light that filters through the translucent porcelain of its petals generates an enveloping illumination. Its structure, as complex as it is poetic, represents the branches of the magnolia tree and is made of black lacquered aluminum. Its LED lighting can be regulated in intensity.

Olga Hanono, an interior designer internationally renowned in the world of art and architecture, uses her bold disruptive style to bring a new focus to the *Firefly* collection, to which this tabletop lamp is the latest addition.

Like the rest of the lamps in the collection, the decoration of this creation features metallic colors and black to contrast with the purity of white porcelain. The lamp shade is black fabric with a golden inner lining to produce a warm, elegant light.

These tabletop lamps combine functionality, beauty and sculptural perfection. The straight lines of the shades and the bases create a sense of harmony while at once contrasting with the figurative forms of the characters depicted.

In both pieces the sculptures are made in delicately decorated white porcelain.

In the *Inner Peace* lamp the sculpture of a woman is rounded off by the floral adornment in her hair. And in the *Protective Angel* lamp the touch of color comes in the branch he is holding in his hand.

These creations represent the greatest joy in the life of any family. A newly-born baby is a reason to celebrate, a source of happiness that these pieces will help us to remember. They are made in matte porcelain and decorated in soft pastel tones. The faces of the babies are notable for the delicate tenderness with which their features are portrayed.
